

CENCA's Bridge in Astrophysics

Internship Learning Records

J. Moisés Arias

Escuela de Física, Universidad Nacional Autónoma de Honduras

Context, foundations and chronological record of
the learning process during the internship in Astro-Chemistry

Supervisor: Ph.D. Adele Plunkett

Mentor: M.Sc. Raquel Mejía

Institute: National Radio-Astronomy Observatory

Contents

1	Dust in the wind	5
1.1	Research justification	5
1.2	Learning goals	5
2	Schedule - Learning program	7
3	Stellar evolution	9
4	Radioastronomy fundamentals	11
5	Radio-telescope and interferometers fundamentals	13
6	ALMA interferometer	15
7	Low mass class 0 systems under study	17
7.1	HH212 as antecedent	17
7.2	Barnard 228	17
7.3	Barnard 335	17
8	Using CARTA to visualize astronomical data	19
8.1	Installing CARTA	19
8.2	Loading data	19
8.3	Contour maps	19
8.4	Statistical analysis	19
8.5	Contour maps revisited	19
9	Astronomical data analysis with Python	21
9.1	Python 101	21
9.2	Astropy	21
10	Achievements chronology	23
11	Conclusions, summary and results	25
12	Bibliographical resources	27

Chapter 1

Dust in the wind

1.1 Research justification

1.2 Learning goals

Chapter 2

Schedule - Learning program

Chapter 3

Stellar evolution

Chapter 4

Radioastronomy fundamentals

Chapter 5

Radio-telescope and interferometers fundamentals

Chapter 6

ALMA interferometer

Chapter 7

Low mass class 0 systems under study

7.1 HH212 as antecedent

7.2 Barnard 228

7.3 Barnard 335

Chapter 8

Using CARTA to visualize astronomical data

8.1 Installing CARTA

8.2 Loading data

8.3 Contour maps

8.4 Statistical analysis

8.5 Contour maps revisited

Chapter 9

Astronomical data analysis with Python

9.1 Python 101

9.2 Astropy

Chapter 10

Achievements chronology

Chapter 11

Conclusions, summary and results

Chapter 12

Bibliographical resources
